Making Space

2016 Project investigating barriers and spatial needs to use of public buildings for users with lived experiences of Autism Spectrum Disorder (ASD) and Borderline Personality Disorder (BPD) during Sensory Overload (ASD) and Dissociation (BPD).

Maximilienne WHITBY

Cambridge Workshop on Universal Access and Assistive Technology (CWUAAT18)

Breaking down barriers between disciplines

Breaking down barriers between users, designers and developers

Removing barriers to usability, accessibility and inclusive design

Breaking down barriers between people with impairments and those without

Breaking down barriers between scientists and policy makers

Removing barriers to open data and open government

Recent barriers to effective rehabilitation robotics

Composite Mapping for Evaluation of Usability of Targeted Affordances

The development and use of a composite mapping methodology within the Sydney Opera House sought a greater understanding of potential barriers to use of targeted affordances for public building users with lived experiences of Autism Spectrum Disorder (ASD) and Borderline Personality Disorder (BPD).

Behavioural Mapping

Environmental Psychology Theory

Map to measure how usable the case study locations are

Why does usability matter?

*and also, why is it hard to measure?

How does the behaviour of other people impact how usable a building is for users with ASD or BPD?

Hierarchy gradient of publicness territorial zones: podium level Sydney Opera House

Observational behavioural mapping pre matinee Sydney Opera House

Participants

- 45% of all Australians will experience a mental or behavioural condition in their lifetime.
(Australian Bureau of Statistics, 2010)
- 17.5 % of Australians experience mental or behavioural conditions at any one point in time.
That is over 4 million people right now. (Australian Bureau of Statistics, 2015)
- 14.4% of Adults in Australia have an Anxiety Disorder (Australian Bureau of Statistics, 2008)
- 5.4 % of Australian Adults currently have some type of Depression (Australian Bureau of Statistics, 2008)
- 1.8% of Adult Australians have a diagnosis of a Bipolar Disorder Australian Bureau of Statistics, 2008)
- Between 1-3.5% of Australians over the age of 18 have Borderline Personality Disorder
(Australian Government National Health and Medical Research Council, 2012)
- Between 0.7% and 2% of Australians have Autism Spectrum Disorder (Australian Bureau of Statistics, 2017)
